The key ingredients to home building

Icon Legacy Custom Modular Homes was formed by a group of industry and business professionals in 2007 to provide quality oriented modular homes to meet the increasing market demand. The company's 62,000 square foot building, housing both office and manufacturing space, is located in Selinsgrove, Pennsylvania.

All combined, the owners have 185 years experience in the housing industry. The key components at Icon Legacy Custom Modular Homes have created a company culture that has catapulted the company to the forefront of the industry with a positive attitude, attention to detail, and excellent customer service.

Since our inception, we have not only grown as a company, but have retained our core values. We believe hard work and dedication are key ingredients to our success in providing quality homes at an exceptional value.

EAST COAST

We build and deliver our custom modular homes through a network of local professional builders in PA NY NJ DE MD VA WV CT RI MA VT NH ME NC SC.

AS ELEGANT AS YOU WANT

At Icon Legacy Custom Modular Homes, the difference is in the details. Choose from hundreds of options to customize a home that reflects your taste and style.

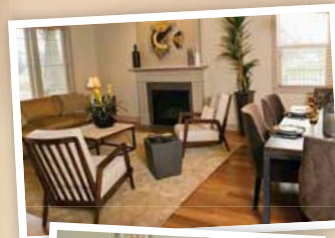

HOW GREEN ARE WE?

Construction in an enclosed indoor environment contributes to reduced waste of material, lessens the environmental impact on the land and the community where the house is being delivered. We also use Green Building practices and Energy Star® products for greater energy efficiency.

BRINGING IT ALL TOGETHER

Once the modules are delivered, your home can be completed and ready for move-in in as little as 4 weeks, depending on your builder.
